Cane Creek Uranium Mine

M/019/007

This five acre underground mine was reclaimed by Atlas Minerals in the spring of 1984. The site was located on the side of a cliff near Moab.

Reclamation consisted of:

- (1) Blasting or bulldozing portals shut
- (2) Recontouring the narrow access roads and installing water bars
- (3) seeding

The lower portals were later reopened by W. K. Enterprises in 1987 under a state lease agreement.
